HISTORY

The husband, wife, and teenage daughter have been living in this residence for approximately two months. The residence is a two-bedroom mobile home and located in a rural setting with significant distances between residences. The clients report highly active paranormal activity including, shadow figures, touching, voices, and other noises. The spirit is believed to be an older male who has fixated primarily on the daughter who, is strongly believed to be sensitive to this type of activity. She reports seeing this spirit man as well as hearing him. He has reported to be physical to persons in the home including producing scratches. Recently, the owners contacted a psychic medium by phone who informed them that the entity was a man who lived on the property in the past and had murdered his family. The medium also stated she had cleared the negative activity if not the spirit. The residence has also been saged which had temporarily decreased the activity for a time.

INVESTIGATION

Date of Investigation: August 1, 2020

Equipment:

Digital Voice Recorders

GoPro full-spectrum camera, IR illuminators

PS-7 Spirit Box

Electro Magnetic Field (EMF) detectors: Rem-Pod, Mel Meter

The investigation began at approximately 8:00 pm and included EVP sessions in both bedrooms with more time spent

in the daughter's bedroom as it has the most reported activity. The entire investigation was monitored by a GoPro full-spectrum camera located in the master bedroom and recording the entire length of the home. All efforts resulted in no personal experiences or evidence on digital recorders or GoPro camera. Also, no hits or anomalies were detected on EMF equipment. A cleansing with Palo Santo wood was performed throughout the residence before the clients returned.

When the clients returned at the end of the investigation, the daughter, her cousin, and Bess Maxwell did a short EVP session in the daughter's bedroom. The daughter stated that the entity was present at that time. Upon being urged to tell him to leave by the cousin, the daughter complied and reported that he was no longer there. The investigation ended at approximately 11:00 pm.

Personal Experiences

None Reported

Model P-SB7 Spirit Box:

Nothing captured

EVP's: (Electronic Voice Phenomenon)

Nothing captured

Kinnect:

Not utilized

EMF detectors

Nothing experienced

Conclusion

The investigators concluded after the investigation, that the activity reported in the residence, although very credible, was not noticeably active during the investigation. If the daughter is indeed as sensitive as it seems, this problem may persist until she learns how to control those abilities.
