

# **INVESTIGATION SUMMARY REPORT**

**FORRY PLANTATION  
MNAGHAM, LA.**

**JOHN COMBS  
CASE MANAGER  
LOUISIANA SPIRITS  
NORTH TEAM**

**NOTE: THE CLIENT IN THIS INVESTIGATION HAS ALLOWED REASONABLE  
RELEASE OF DATA GATHERED ON THE RESEARCH EFFORTS  
OF APRIL 28<sup>th</sup>, 2012.**

# HISTORY

This residence was built in the early 1900's by the first doctor in Mangham, LA., and his wife. It is of wooden construction, on pier and beam. There two smaller wooden, pier and beam, homes in the back of the main home. These two smaller homes were used as servants' quarters, have not been maintained over the years, and thus not currently habitable. These building have had a history in the local community of having strange and unexplainable things happening.

# EXPERIENCES

The current client, as well as family members and guests, have seen apparitions in the living room, and there are reports of piano music being heard in this area, with no one around to initiate these sounds, and in many occasions, no piano in the area. The master bedroom/bath/closet area has a heavy, oppressive atmosphere, noticed by clients as often commented on by first-time guests. In the area near the back porch, strong smells consistent with horses and a stable have been noticed, though these are no longer there. The client's grandson seems to see and interact with individuals not otherwise seen or heard.

# INVESTIGATION

DATE OF INVESTIGATION: APRIL 28<sup>th</sup>, 2012

PARTICIPANTS: BESS MAXWELL, CONNIE WILLIAMSON, KEITH MYERS, TRACI MYERS, JOHN COMBS

EQUIPMENT: Digital Cameras, Infrared cameras and DVR system, Digital audio recorders, Ion Counters, P-SB7 Spirit Box, Infra-sound detection equipment, Digital thermometers, Various EMF meters including Tri-Fields, Motion detectors including geophone and laser grid systems, Ovilus interactive voice communications device, and PEAR REG-1 units for the detection of anomalous human consciousness with software on Hewlett-Packard computers.

INVESTIGATION: At the time and places tested, no anomalous photos were taken. No data was noted on video, or digital photography. Nothing unusual was detected by laser grid or geophone. No high EMF fields from AC current were found in any location likely to result in prolonged exposure, although there are some areas of high EMF fields from older wiring. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. Several EVP voices were recorded, including EVP words formed by the energy from the P-SB7.

A limited amount of data was recorded form the Ovilus device. No excessive positive ion counts were

noted. No infrasound, nor standing waves of such, were detected at times of testing, in the areas of testing. No inordinate positive ion counts were noted.

## PERSONAL EXPERIENCES

JOHN COMBS – BESS MAXWELL – TRACI MYERS – CONNIE WILLIAMSON

In the early evening hours, I was performing computer REG-1 consciousness testing in the rear servant's residence, and was alone. In several instances (about 4 to 5 times), while programming software on the test computer in the living room, I heard footsteps plainly approach me from behind, coming from the area where the bathroom had once been. Upon inspection, each time, no one was visible, or had time to move out of my range of vision. As this seemed to repeat, I did not report the incident, or its exact details to others. At the end of the evening, Bess Maxwell, Traci Myers, and Connie Williamson reported the same phenomenon, in the same area, under the same circumstances to me, none of the three aware that these details matched my earlier experiences, of the same description, in the same area.

BESS MAXWELL – Near the end of the investigation, Bess Maxwell went to outbuilding 1 to retrieve a camera. As she went to step upon the porch, she detected the smell of horses and leather, a reported phenomenon in this area. It faded quickly, and no known source was found.

# PART TWO

## Consciousness Detection

This type of testing is passive in nature and designed to detect, through the quantum tunneling method, the probability that a human type consciousness may be present affecting the REG-1 units, when all incarnate consciousness has been removed from the areas of testing.. The minimum reporting standard for this type testing is  $p < .05$ , with  $p$  (probability) representing the chance that the event could be the result of chance alone in the probability distribution. Thus, the probability of an anomaly is 95% per test, or greater, to be considered statistically significant. We then compute the probability that all tests are false, that is, that none of the tests indicate an anomaly.

A total of 81 tests were run in all areas. At the minimum reporting standard of .05, we would expect to receive a total of 4.05 tests (4.0) due to chance alone affecting the probability distribution, resulting in 4.05 (4.0) false positives for the human consciousness being the cause. ( $81 \times .05 = 4.05$ ) The actual mean score for the 42 positive tests was  $p < .022892$ . The correction for the number of expected false positives would be  $81 \times .022892 = 1.85$  false positives, which we would round up to 2. As noted, we received 42 positives, much greater than the mathematically expected 2 if only chance were involved.

After the room designation, the number or alpha character designates the test number or sequence in that room, on that particular testing computer.

EXAMPLE: BRThree1 Bedroom number three, test number one.

The test scores are as follows:

### COMPUTER 1 B1 is the front servant's quarters.

B1 Kitchen2	$z = 1.867$	$p < .030951$
B1 Kitchen4	$z = 1.662$	$p < .048256$
B1 Kitchen5	$z = 2.140$	$p < .016177$
Front BR Upstairs1	$z = 2.898$	$p < .001878$
Front BR Upstairs2	$z = 1.678$	$p < .046674$
Front BR Upstairs3	$z = 2.457$	$p < .007005$
Front BR Upstairs4	$z = 1.792$	$p < .036566$
Hall Upstairs1	$z = 1.992$	$p < .023186$

### COMPUTER 2

Middle BR Upstairs1	$z = 1.913$	$p < .027874$
Middle BR Upstairs3	$z = 1.686$	$p < .045898$
Middle BR Upstairs4	$z = 1.782$	$p < .037375$
Middle BR Upstairs5	$z = 1.907$	$p < .028260$
Bathroom Up1	$z = 2.784$	$p < .002998$
Bathroom Up2	$z = 2.796$	$p < .002587$

### COMPUTER 3 B1 is the front servant's quarters.

B1 Bedroom2 Test1	$z = 1.729$	$p < .041905$
B1 Bedroom2 Test2	$z = 1.690$	$p < .045514$

## PART THREE

### The Ovilus

*Carl Jung, Swiss psychiatrist and the father of analytical psychiatry, coined the word “synchronicity”.*

*Synchronicity - The experience of two or more events , that are apparently causally unrelated or unlikely to occur together by chance, that are observed to occur together in a meaningful manner.*

*This concept does not question or compete with the notion of causality. Instead, it maintains that just as events may be grouped by cause, they may also be grouped together by meaning. Since meaning is a complex mental construction, subject to both conscious and unconscious influence, not every correlation in the grouping of events by meaning needs to have an explanation of cause and effect.*

**NOTE:** In the paranormal, there are many experiences which are noted and observed for which the laws of science, as we know and understand them at this time, cannot explain. In EVP studies, blank and sealed cassette tapes have been found to have EVP voices on them, without having been previously inserted into a recorder. The actual method of the sending of EVP voices remains unknown. Television sets, while turned off, have had faces of the deceased plainly visible, as if the set were on. Telephone calls with the caller having the voice and knowledge of a deceased individual have been heavily documented. Phone calls and text messages have been sent to cell phones which have no SIM card to properly receive calls, but do receive the anomalous calls. We simply do not know, at this time, exactly how these events occur or are possible.

In paranormal research, it is the reporting of these cases that is important. These and similar phenomena are reported by individuals who have never met or known each other, and live thousands of miles apart, and often hundreds of years. Yet the reports remain consistent. Case studies, in volume and over time, allow for hypotheses and theories. It is in this simple interests of reporting that this section is included.

The Ovilus is a device that intercepts EMF signals, and converts them to audio, from an internal dictionary of over 2,000 words. It is theorized that discarnate entities may be able to INFLUENCE, under some circumstances, this word selection process. It is not thought, in the majority, that these entities may exert 100% CONTROL over the word selection, and simple research and listening to the output of the device verifies this, to the normal and reasonable individual. It is also noted that coincidence may play a part in the process, with the probability of about 1 in 2.047, in getting a correct response to a direct question. It is only in the long term studies, with consistent reporting, that more exacting theories regarding coincidence versus influence may be formulated. Probability, from a math standpoint, rises sharply as valid answers are observed in larger quantity, over a brief period of time and small number of total responses. For example, the probability of getting two correct responses in a row is 1 in 4,190,209. ( $1/2047 \times 1/2047$ ) This assumes there is only one correct response per each individual question.

The manufacturer of the Ovilus device indicates at the present time, there is insufficient data, science, and case study to indicate the Ovilus data should be evidential. This author agrees. This case study is not presented as hard evidence. It is presented so that others may have and consider its merits, or lack thereof. If no reporting is made, no theories may be formulated, or comparisons made with other reports to study correlations, if any. Each person who reads Part

**Three must consider this data in light of his own beliefs, or knowledge of events that are known to have occurred to them personally. Beauty here is truly in the eye of the beholder, or its lack thereof.**

**SUMMARY OF INTRODUCTION - PART THREE - The data presented here on Part Three IS NOT CONSIDERED EVIDENTIAL by the manufacturer of the Ovilus device or the La. Spirits North Team. It is simply included in the interests of completeness of events, and for study/research purposes only.**

**CLOSING NOTES – PART THREE**

**There may have been additional incidents, or not. We have presented these incidents in Part Three in the interests of research and completeness of studies performed. It is acknowledged that answers may, in many cases, rely on judgment as to the accuracy of the answer. If the question, “Is the car red?” is posed, assuming the car’s color is not a transition color, the answer of either**

**“yes” or “no” may be easily evaluated. Or, assuming no transition color, the answer to “What color is the car?”, the answer “red” may be easily evaluated. Others are not so simple, “Happy”, for example. And it is readily acknowledged that those hearing a response from an Ovilus device may NOT have sufficient knowledge to correlate a given answer as relevant or “correct”. The volume of comments received from the Ovilus device was very large, and there may be meanings that those of us not experiencing daily life at this home, or intimately familiar with its history, do not have a connotation for. The list is presented as received, in proper order, in the interest of completeness of research conducted. It is also noted that, although the words are spoken individually, there may be meanings or connotations in word groupings within word lists. These meanings or connotations may only be meaningful to certain individuals with the experiences to which these word phrases pertain, and not to all individuals. Words within the list that have an inordinate statistical frequency of appearance may also fall within the meaningful category, and need to be analyzed by those with a more intimate knowledge of the history of the location.**

**END  
PART THREE**

# FOUR

## THE MODEL P-SB7 SPIRIT BOX

This device utilizes a milli-second adjustable forward or reverse sweep technique coupled with a white noise distribution between frequency steps. This is designed to add ambient sound energy for the production of real time EVP, allowing for instant feedback in communications attempts. See item 16 in “General Parameters of the EVP Phenomenon”.

**CLIP ONE** This was recorded in the front outbuilding. Bess asks, “Can you tell me what your name is?”. A male voice responds, “Doc”.

**CLIP TWO** This was recorded in the same location. A female voice comments, “Show him”.

**CLIP THREE** This was also from outbuilding one. A female voice calls, “Frank”.

**CLIP FOUR:**

**TRACI MYERS:** “We are going to be leaving you shortly”.

**BESS MAXWELL:** “Yeah”.

**TRACI MYERS:** “Leave you all alone”.

**MALE VOICE:** “Thank you!”.

**CLIP FIVE:**

**KEITH MYERS:** “So long, or take care, or get out, ....see ya'.”

**VOICE:** “Outward”.

**KEITH MYERS:** “Beat it”.

**VOICE:** “OUT!”.

### EVP – RECORDED WITHOUT THE S-PB-7 SPIRIT BOX

**CLIP SIX:** Bess Maxwell

A small girl's voice is recorded saying, “Daddddyy”. (Slightly drawn out word.)

**CLIP SEVEN:** Connie Williamson

Keith Myers states, “Seriously, talk to us”. A small voice responds, “Talk to us”.

**CLIP EIGHT:** Connie Williamson

The sounds of what seems to be children's voices, singing in a choir-like manner, “Glory to thee”.

**CLIP NINE:** Connie Williamson

Bess Maxwell comments, “Messy, Messy, Messy”, and a female voice responds, “What is, is what is”.

**CLIP TEN:** Connie Williamson

A voice is recorded in the main house with the greeting, “Hello”.

**CLIP ELEVEN: Connie Williamson**

**This was recorded in the front servants' quarters. Bess Maxwell asks, "Do you watch over Rylan?", and one voice responds, "Why?" and a second voice responds, No".**

**CLIP TWELVE: Connie Williamson**

**This was recorded in the main house. Connie Williamson comments on the number of cake dishes, and a small voice responds, "Oh, could I see you".**

**CLIP THIRTEEN: Connie Williamson**

**A voice requests, "Talk to me".**

**CLIP FOURTEEN: Connie Williamson**

**Two voices were recorded. The first anomalous voice states, "I like this.", and a second voice asks, Why?".**

# **FORRY PLANTATION REPORT**

## **PART FIVE**

### **THEORETICAL EFFECTS OF ENVIRONMENTAL ENERGY ON PARANORMAL PHENOMENA**

Over many years, there seem to be consistent reports from individuals who live many miles, and often, many years apart concerning a correlation between extra energy in the environment and a perceived increase in paranormal activity. It is readily acknowledged that the sun is the greatest source of energy in our solar system, and this energy is in a constant state of flux. When solar energy is increased through solar flares, and other types of solar activity, the number of reports of paranormal activity increases. These flares and eruptions cause x-ray events, radio events, proton flux, electron flux, and geomagnetic impulses. It is readily acknowledged that these effect everything on our planet from weather, to satellite communications, disruptions in electrical grids, and even the flow in pipelines. These events also result in what is known as geomagnetic induced currents (gic) or telluric currents in the earth's crust, and waterways. These electrical flows tend to go toward the sun in general, as well as toward the equator in the daytime, and the poles at night.

We do not, at this time, totally understand how environmental energy sources can effect paranormal phenomena in a direct manner, or even if they do. Also, this author readily concedes that if paranormal activity is increased by local energy, that solar energy is not the only available source of local energy; it is just the most prevalent. If this relationship does exist, it would support the general observations of myself and others of a propensity of paranormal activity to be detectable in areas where water and large quartz deposits are found, as these would be conductors for the telluric currents, thus making energy readily available.

This author feels that in order to perform research on the correlations of solar weather and paranormal activity, long term case studies offer the best method, as of this time, to find support, or to deny, this hypothesis. Therefor, data concerning solar weather for the date of our paranormal investigations will be supplied, with no efforts made to draw conclusions thereof, either positive or negative. This data is provided by the National Oceanic and Atmospheric Administration. The NOAA also readily states that the total effects of space weather on live biological entities on planet earth is not known or understood at this time, either.

If an attached graph does not show activity on the date and/or time of our investigation, it does not mean that there was no solar activity, but the the solar activity at this time was considered normal.

**CONCLUSION:** This data is not meant to conclusively show that any paranormal activity, or lack thereof, found on our investigation was caused by the solar activity at that time, but that there could possibly have been an influence by the solar weather at this time, positively or negatively correlated to the strength of such solar weather. Other such energy systems as lunar cycles, thunderstorms, and utility networks may provide an alternative energy supply for paranormal phenomena.

# NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION SPACE WEATHER ALERTS AND BULLETINS

**CONCLUSION: EXCEPT FOR MINOR ELECTRON FLUX, SPACE WEATHER CONDITIONS WERE NORMAL AT THE TIME OF INVESTIGATION.**

# CONCLUSION

At the time and places tested, no anomalous photos were taken. No data was noted on video. Nothing unusual was detected by laser grid or geophone. No high EMF fields from AC current were found in any location likely to result in prolonged exposure, although there are some areas of high EMF fields from older wiring. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. Five recordings were made of EVP voices formed using the the assistance of P-SB7, and one EVP voice was obtained. No excessive positive ion counts were noted. No infrasound, nor standing waves of such, were detected at times of testing, in the areas of testing. The consciousness testing was strong, and consistent in many areas. We feel that the personal experiences, the extensive audio noted, and the positive tests received in the PEAR testing are probably indicative of an anomalous presence or presences

We would like to thank the client for inviting us into her home, and for the opportunity to study the phenomena there. We would also like to thank her for her most gracious hospitality, and hope that we may be able to return there again soon.
