

INVESTIGATION SUMMARY REPORT

**PRIVATE RESIDENCE
RUSTON, LA.**

**JOHN COMBS
CASE MANAGER
LOUISIANA SPIRITS
NORTH TEAM**

**NOTE: THE CLIENTS IN THIS INVESTIGATION HAVE REQUESTED
CONFIDENTIALITY. SOME OF THE DATA IN THIS REPORT MAY HAVE BEEN
OBSCURED TO HONOR THEIR REQUEST. THIS IN NO WAY AFFECTS THE DATA
PRESENTED, OR ANY CONCLUSIONS HEREIN. NO PHOTOS OF THE INTERIOR OR
THE EXTERIOR OF THE RESIDENCE HAVE BEEN INCLUDED.**

HISTORY

This home is an older home, wood and on pier and beam construction. When the current clients moved into this home, some remodeling work was performed. The home is over 50 years of age, thus its exact history is unknown and unknowable.

EXPERIENCES

The client has experienced paranormal activity in various locations for the past fourteen years. These have been as varied as Shreveport, Monroe, and Ruston. Footsteps and voices are heard. Appliances and other electrical devices and turned off and no, including lights, when no one is around to have done so. Objects from the interior of the home are found moved into the attic, with no reasonable, natural explanation known. Shadow figures are seen, including the living and dining area. The figure of a small girl has been seen in the front bedroom. Doors are heard opening and closing, louder than normal. The client has felt the sensation of unseen hands touching her. At night, the sensation of someone approaching the bed, and sitting down upon the bed with no one visible to have done so, is experienced.

INVESTIGATION

DATE OF INVESTIGATION: October 13th, 2012

PARTICIPANTS: BESS MAXWELL, JOHN COMBS, CONNIE WILLIAMSON, KIRK CORMIER

EQUIPMENT: Digital Cameras, Infrared cameras and DVR system, Digital audio recorders, Ion Counters, P-SB7 Spirit Box, Infra-sound detection equipment, Digital thermometers, REM-Pod, Various EMF meters including Tri-Fields, Motion detectors including geophone and laser grid systems, Ovilus interactive voice communications device, and PEAR REG-1 units for the detection of anomalous human consciousness with software on Hewlett-Packard computers.

INVESTIGATION: At the time and places tested, no anomalous photos were taken. No data was noted on video. Nothing unusual was detected by laser grid or geophone. No high EMF fields from AC current were found in any location likely to result in prolonged exposure, although there are some areas of high EMF fields from appliances. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. Twelve EVP voices were recorded, and eleven EVP clips were formed using the P-SB7.

A limited amount of data was recorded from the Ovilus device. No excessive positive ion counts were noted. No infrasound, nor standing waves of such, were detected at times of testing, in the areas of testing. Consciousness testing was strong and consistent.

PART TWO

Consciousness Detection

This type of testing is passive in nature and designed to detect, through the quantum tunneling method, the probability that a human type consciousness may be present affecting the REG-1 units, when all incarnate consciousness has been removed from the areas of testing.. The minimum reporting standard for this type testing is $p < .05$, with p (probability) representing the chance that the event could be the result of chance alone in the probability distribution. Thus, the probability of an anomaly is 95% per test, or greater, to be considered statistically significant. We then compute the probability that all tests are false, that is, that none of the tests indicate an anomaly.

A total of 35 tests were run in all areas. At the minimum reporting standard of .05, we would expect to receive a total of 1.75 (deemed as 2.0) due to chance alone affecting the probability distribution, resulting in 2.0 false positives for the human consciousness being the cause. ($35 \times .05 = 1.75$, as 2.0) The actual mean score for the 20 positive tests was $p < .014580$. The correction for the number of expected false positives would be $35 \times .014580 = .51$ false positives, as 1.0 As noted, we received 20 positives, much greater than the mathematically expected 1 if only chance were involved.

After the room designation, the number or alpha character designates the test number or sequence in that room, on that particular testing computer.

EXAMPLE: BRThree1 Bedroom number three, test number one.

The test scores are as follows:

COMPUTER 1

Five tests run, and no positive tests were noted.

COMPUTER 2

Middle Bedroom 3	$z = 1.821$	$p < .034303$
Middle Bedroom 5	$z = 2.543$	$p < .005495$
Dining Room 1	$z = 1.799$	$p < .036009$
Living Room 1	$z = 1.648$	$p < .049676$

COMPUTER 4

Bath 1	$z = 2.369$	$p < .008918$
Bath 4	$z = 2.177$	$p < .014740$
Kitchen 2	$z = 2.269$	$p < .022634$
Kitchen 4	$z = 2.575$	$p < .005012$
Living Room 4	$z = 2.633$	$p < .004232$
Living Room 5	$z = 2.254$	$p < .012098$

COMPUTER 5

Front BR 2	$z = 2.348$	$p < .009437$
Front BR 4	$z = 1.980$	$p < .023852$
Front BR 5	$z = 2.512$	$p < .006012$

PART THREE

The Ovilus

Carl Jung, Swiss psychiatrist and the father of analytical psychiatry, coined the word “synchronicity”. Synchronicity - The experience of two or more events, that are apparently causally unrelated or unlikely to occur together by chance, that are observed to occur together in a meaningful manner.

This concept does not question or compete with the notion of causality. Instead, it maintains that just as events may be grouped by cause, they may also be grouped together by meaning. Since meaning is a complex mental construction, subject to both conscious and unconscious influence, not every correlation in the grouping of events by meaning needs to have an explanation of cause and effect.

NOTE: In the paranormal, there are many experiences which are noted and observed for which the laws of science, as we know and understand them at this time, cannot explain. In EVP studies, blank and sealed cassette tapes have been found to have EVP voices on them, without having been previously inserted into a recorder. The actual method of the sending of EVP voices remains unknown. Television sets, while turned off, have had faces of the deceased plainly visible, as if the set were on. Telephone calls with the caller having the voice and knowledge of a deceased individual have been heavily documented. Phone calls and text messages have been sent to cell phones which have no SIM card to properly receive calls, but do receive the anomalous calls. We simply do not know, at this time, exactly how these events occur or are possible.

In paranormal research, it is the reporting of these cases that is important. These and similar phenomena are reported by individuals who have never met or known each other, and live thousands of miles apart, and often hundreds of years. Yet the reports remain consistent. Case studies, in volume and over time, allow for hypotheses and theories. It is in this simple interests of reporting that this section is included.

The Ovilus is a device that intercepts EMF signals, and converts them to audio, from an internal dictionary of over 2,000 words. It is theorized that discarnate entities may be able to INFLUENCE, under some circumstances, this word selection process. It is not thought, in the majority, that these entities may exert 100% CONTROL over the word selection, and simple research and listening to the output of the device verifies this, to the normal and reasonable individual. It is also noted that coincidence may play a part in the process, with the probability of about 1 in 2,047, in getting a correct response to a direct question. It is only in the long term studies, with consistent reporting, that more exacting theories regarding coincidence versus influence may be formulated. Probability, from a math standpoint, rises sharply as valid answers are observed in larger quantity, over a brief period of time and small number of total responses. For example, the probability of getting two correct responses in a row is 1 in 4,190,209. ($1/2047 \times 1/2047$) This assumes there is only one correct response per each individual question.

The manufacturer of the Ovilus device indicates at the present time, there is insufficient data, science, and case study to indicate the Ovilus data should be evidential. This author agrees. This case study is not presented as hard evidence. It is presented so that others may have and consider its merits, or lack thereof. If no reporting is made, no theories may be formulated, or comparisons made with other reports to study correlations, if any. Each person who reads Part Three must consider this data in light of his own beliefs, or knowledge of events that are known

to have occurred to them personally. Beauty here is truly in the eye of the beholder, or its lack thereof.

SUMMARY OF INTRODUCTION - PART THREE - The data presented here on Part Three IS NOT CONSIDERED EVIDENTIAL by the manufacturer of the Ovilus device or the La. Spirits North Team. It is simply included in the interests of completeness of events, and for study/research purposes only.

PART FOUR

THE MODEL P-SB7 SPIRIT BOX

This device utilizes a milli-second adjustable forward or reverse sweep technique coupled with a white noise distribution between frequency steps. This is designed to add ambient sound energy for the production of real time EVP, allowing for instant feedback in communications attempts. See item 16 in “General Parameters of the EVP Phenomenon”.

RECORDED BY BESS MAXWELL:

CLIP ONE: Kirk Cormier, Bess Maxwell, Connie Williamson in the Living Room.

Received as a comment.

Voice One: “Father?”

Voice Two: “Come back”.

CLIP TWO: Same people in the Living Room.

Received as a comment.

Voice One: “Melinda”.

CLIP THREE: Same people in the Living Room.

Bess Maxwell asks, “Why are you here?”.

Voice One: “No right”.

CLIP FOUR: Same people in the Living Room.

Connie Williamson asks, “How many.....How many people are here? Spirits with us?”

Voice One: “Don't know”.

CLIP FIVE: Same people in the Living Room.

Received as a comment.

Voice One: “Leave us.”

CLIP SIX: Same people in the Living Room.

Received as a comment.

Voice One, in a sing-song voice: “OOWWW”, similar to vocalizations by James Brown.

CLIP SEVEN: Same people in the Middle Bedroom.

Received as a comment only.

Voice One: “Melinda.....Melinda”.

RECORDED BY CONNIE WILLIAMSON

CLIP EIGHT: Recorded in Daughter's Bedroom, investigators and client family present.

Bess Maxwell referring to a request for a name, “If you have one”.

Voice one: “What?”

Voice Two: “Have one”

Voice Three: “I have one”.

CLIP NINE: Same place, time, people.

Bess Maxwell comments, "You need to communicate with us tonight because if you don't we are just going to keep coming back until you do."

Voice One: "That's alright".

CLIP TEN: Same place, time, people.

Bess Maxwell comments, "Can you tell us who you are?"

Voice One, from the Spirit Box: "I'm Walter".

Voice Two, Standard EVP, NOT from the spirit box, "I just want to help".

CLIP ELEVEN: In response to Bess Maxwell asking for the name of an investigator.

Voice One: "Kirk".

**STANDARD DIGITAL AUDIO RECORDING
NO INTENTIONAL ENERGY ADDED**

RECORDED BY BESS MAXWELL: Connie Williamson, Bess Maxwell, Kirk Cormier in the Living Room.

CLIP ONE:

Kirk Cormier: "Yeah, I worked for the state."

Connie Williamson, "You did?"

Anomalous voice, loud "Sigh".

Bess Maxwell: "What was that?"

Connie Williamson: "What was that?"

RECORDED BY KIRK CORMIER, in the attic, no one present.

NOTE: There were a number of anomalous voices recorded in this session. Due to the traffic and other noise coming directly into the attic, the voices were clearly voices, but the words could not be distinguished. These were clearly not voices from those present in the home, or outside in the yard area.

CLIP TWO:

Voice One: "Go away".

RECORDED BY CONNIE WILLIAMSON:

Daughter's bedroom, investigators and client family present:

CLIP THREE: Received as a comment.

Voice One: "Help me out.....Help me out".

CLIP FOUR: Name received as a comment.

Voice One: "Trey".

CLIP FIVE: Robert speaks:

"Do you enjoy scaring us?"

Voice One: "No".

Kirk Cormier, Bess Maxwell, Connie Williamson in the Living Room.

CLIP SIX:

Voice One: "Get off of it". NOTE: Sofa?

Connie Williamson: "Where's John".

CLIP SEVEN: Received as a comment.

Voice One: "Do you know much I'm saying?"

CLIP EIGHT:

Connie Williamson, "You aren't hiding in the attic are you?"

Voice One: "No".

CLIP NINE:

Kirk Cormier, "What did you hear?"

Voice One, "Connie just said something".

CLIP TEN: Received as a comment.

Voice One: "You're looking fabulous".

CONNIE WILLIAMSON, KIRK CORMIER, BESS MAXWELL in the Middle Bedroom.

CLIP ELEVEN: Received as a comment.

Voice One: "What do you have that on?"

CLIP TWELVE: Received as a comment.

Voice One: "What are you doing?"

NOTE: Voice One, Voice two, etc., are used as a chronological designation in each clip. This is not meant to imply the same voice from clip to clip, or session to session.

PART FIVE

NICHOLS REPORT

THEORETICAL EFFECTS OF ENVIRONMENTAL ENERGY ON PARANORMAL PHENOMENA

Over many years, there seem to be consistent reports from individuals who live many miles, and often, many years apart concerning a correlation between extra energy in the environment and a perceived increase in paranormal activity. It is readily acknowledged that the sun is the greatest source of energy in our solar system, and this energy is in a constant state of flux. When solar energy is increased through solar flares, and other types of solar activity, the number of reports of paranormal activity increases. These flares and eruptions cause x-ray events, radio events, proton flux, electron flux, and geomagnetic impulses. It is readily acknowledged that these effect everything on our planet from weather, to satellite communications, disruptions in electrical grids, and even the flow in pipelines. These events also result in what is known as geomagnetic induced currents (gic) or telluric currents in the earth's crust, and waterways. These electrical flows tend to go toward the sun in general, as well as toward the equator in the daytime, and the poles at night.

We do not, at this time, totally understand how environmental energy sources can effect paranormal phenomena in a direct manner, or even if they do. Also, this author readily concedes that if paranormal activity is increased by local energy, that solar energy is not the only available source of local energy; it is just the most prevalent. If this relationship does exist, it would support the general observations of myself and others of a propensity of paranormal activity to be detectable in areas where water and large quartz deposits are found, as these would be conductors for the telluric currents, thus making energy readily available.

This author feels that in order to perform research on the correlations of solar weather and paranormal activity, long term case studies offer the best method, as of this time, to find support, or to deny, this hypothesis. Therefor, data concerning solar weather for the date of our paranormal investigations will be supplied, with no efforts made to draw conclusions thereof, either positive or negative. This data is provided by the National Oceanic and Atmospheric Administration. The NOAA also readily states that the total effects of space weather on live biological entities on planet earth is not known or understood at this time, either.

If an attached graph does not show activity on the date and/or time of our investigation, it does not mean that there was no solar activity, but the the solar activity at this time was considered normal.

CONCLUSION: This data is not meant to conclusively show that any paranormal activity, or lack thereof, found on our investigation was caused by the solar activity at that time, but that there could possibly have been an influence by the solar weather at this time, positively or negatively correlated to the strength of such solar weather. Other such energy systems as lunar cycles, thunderstorms, and utility networks may provide an alternative energy supply for paranormal phenomena.

Space Weather Alerts and Warnings Timeline

**NOTE: DATE OF INVESTIGATION 10/20/2012
 AT TIMES OF TESTING, CONDITIONS WERE ABOVE NORMAL.**

END OF PART FIVE

CONCLUSION

At the time and places tested, no anomalous photos were taken. No data was noted on video. Nothing unusual was detected by laser grid. No high EMF fields from AC current were found in any location likely to result in prolonged exposure, although there are some areas of high EMF fields from appliances and electrical devices. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. Eleven EVP voices were made of words formed from the P-SB7, and twelve standard EVP clips by normal digital recording. No excessive positive ion counts were noted. No infrasound, nor standing waves of such, were detected at times of testing, in the areas of testing. The consciousness testing was strong, and consistent in many areas. The Ovilus data was limited in quantity, though we are not sufficiently familiar with the residence and family dynamics to draw any conclusions from this data. Consciousness testing was strong and consistent. We feel that these experiences, and the positive tests received are probably indicative of an anomalous presence or presences, and that these do not seem malicious or harmful in any way.

We would like to thank the clients for inviting us into their home, and for the opportunity to study the phenomena there. We would also like to thank them for their most gracious hospitality, and hope that me may be able to return there again soon.
