HISTORY

The home is brick construction on concrete slab, and was built in about 1970. The clients have lived there about one year. The past history is unknown.

EXPERIENCES

There are reports of a full-bodied apparitions and shadow figures. Objects are often moved, as if by unseen hands. There are banging noises on the walls. Strange voices are heard.

INVESTIGATION

DATE OF INVESTIGATION: January 14th, 2017

PARTICIPANTS: BESS MAXWELL, KIRK CORMIER, AND CONNIE WILLIAMSON.

EQUIPMENT: Digital Cameras, Infrared cameras and DVR system, Digital audio recorders, Ion Counters, P-SB7 Spirit Box, Infra-sound detection equipment, Digital thermometers, Various EMF meters including Tri-Fields and Rempod, Motion detectors including geophone and laser grid systems, and Ovilus interactive voice communications device.

INVESTIGATION: At the time and places tested, no anomalous photos were taken. No data was noted on video. Nothing unusual was detected by laser grid or geophone. High EMF fields from AC current were found in many locations likely to result in prolonged exposure. No anomalous hot spots were noted. No anomalous motions were noted. Two EVP clips were recorded. No EVP clips formed by the P-SB7 were noted.

PERSONAL EXPERIENCES

Bess Maxwell experienced a sense of coldness in the hallway, where the Rempod fired several times without known natural cause.

PART ONE - AUDIO

THE MODEL P-SB7 SPIRIT BOX

This device utilizes a milli-second adjustable forward or reverse sweep technique coupled with a white noise distribution between frequency steps. This is designed to add ambient sound energy for the production of real time EVP, allowing for instant feedback in communications attempts. See item 16 in “General Parameters of the EVP Phenomenon”.

NO AUDIO CLIPS WERE OBTAINED ON THE P-SB7.

STANDARD EVP AUDIO, WITH NO INTENTIONALLY ADDED ENERGY SOURCE

TWO OBTAINED.

CLIP ONE: BESS MAXWELL IN THE LIVING ROOM

BESS MAXWELL: “DID SOMETHING BAD HAPPEN TO YOU?”

FEMALE VOICE: “NO”, FOLLOWED BY A SIGH.

CLIP TWO: CONNIE WILLIAMSON IN THE LIVING ROOM

CONNIE WILLIAMSON: “I AM SCRATCHING MY ARM.”

MALE VOICE RESPONDS BUT THE EXACT WORDAGE IS OPEN TO INTERPRETATION.

PART TWO

The Ovilus

Carl Jung, Swiss psychiatrist and the father of analytical psychiatry, coined the word “synchronicity”. Synchronicity - The experience of two or more events, that are apparently causally unrelated or unlikely to occur together by chance, that are observed to occur together in a meaningful manner.

This concept does not question or compete with the notion of causality. Instead, it maintains that just as events may be grouped by cause, they may also be grouped together by meaning. Since meaning is a complex mental construction, subject to both conscious and unconscious influence, not every correlation in the grouping of events by meaning needs to have an explanation of cause and effect.

NOTE: In the paranormal, there are many experiences which are noted and observed for which the laws of science, as we know and understand them at this time, cannot explain. In EVP studies, blank and sealed cassette tapes have been found to have EVP voices on them, without having been previously inserted into a recorder. The actual method of the sending of EVP voices remains unknown. Television sets, while turned off, have had faces of the deceased plainly visible, as if the set were on. Telephone calls with the caller having the voice and knowledge of a deceased individual have been heavily documented. Phone calls and text messages have been sent to cell phones which have no SIM card to properly receive calls, but do receive the anomalous calls. We simply do not know, at this time, exactly how these events occur or are possible.

In paranormal research, it is the reporting of these cases that is important. These and similar phenomena are reported by individuals who have never met or known each other, and live thousands of miles apart, and often hundreds of years. Yet the reports remain consistent. Case studies, in volume and over time, allow for hypotheses and theories. It is in this simple interests of reporting that this section is included.

The Ovilus is a device that intercepts EMF signals, and converts them to audio, from an internal dictionary of over 2,000 words. It is theorized that discarnate entities may be able to INFLUENCE, under some circumstances, this word selection process. It is not thought, in the majority, that these entities may exert 100% CONTROL over the word selection, and simple research and listening to the output of the device verifies this, to the normal and reasonable individual. It is also noted that coincidence may play a part in the process, with the probability of about 1 in 2,047, in getting a correct response to a direct question. It is only in the long term studies, with consistent reporting, that more exacting theories regarding coincidence versus influence may be formulated. Probability, from a math standpoint, rises sharply as valid answers are observed in larger quantity, over a brief period of time and small number of total responses. For example, the probability of getting two correct responses in a row is 1 in 4,190,209. ($1/2047 \times 1/2047$) This assumes there is only one correct response per each individual question.

The manufacturer of the Ovilus device indicates at the present time, there is insufficient data, science, and case study to indicate the Ovilus data should be evidential. This author agrees. This case study is not presented as hard evidence. It is presented so that others may have and consider its merits, or lack thereof. If no reporting is made, no theories may be formulated, or comparisons made with other reports to study correlations, if any. Each person who reads Part Three must consider this data in light of his own beliefs, or knowledge of events that are known

to have occurred to them personally. Beauty here is truly in the eye of the beholder, or its lack thereof.

SUMMARY OF INTRODUCTION - PART THREE - The data presented here on Part Three IS NOT CONSIDERED EVIDENTIAL by the manufacturer of the Ovilus device or the La. Spirits North Team. It is simply included in the interests of completeness of events, and for study/research purposes only.

CLOSING NOTES – PART THREE

There may have been additional incidents, or not. We have presented these incidents in Part Three in the interests of research and completeness of studies performed. It is acknowledged that answers may, in many cases, rely on judgment as to the accuracy of the answer. If the question, “Is the car red?” is posed, assuming the car’s color is not a transition color, the answer of either “yes” or “no” may be easily evaluated. Or, assuming no transition color, the answer to “What color is the car?”, the answer “red” may be easily evaluated. Others are not so simple, “Happy”, for example. And it is readily acknowledged that those hearing a response from an Ovilus device may NOT have sufficient knowledge to correlate a given answer as relevant or “correct”. The volume of comments received from the Ovilus device was very large, and there may be meanings that those of us not experiencing daily life at this home, or intimately familiar with its history, do not have a connotation for. The list is presented as received, in proper order, in the interest of completeness of research conducted. It is also noted that, although the words are spoken individually, there may be meanings or connotations in word groupings within word lists. These meanings or connotations may only be meaningful to certain individuals with the experiences to which these word phrases pertain, and not to all individuals. Words within the list that have an inordinate statistical frequency of appearance may also fall within the meaningful category, and need to be analyzed by those with a more intimate knowledge of the history of the location.

**END
PART TWO**

CONCLUSION

At the time and places tested, no anomalous photos were taken. No data was noted on video. Nothing unusual was detected by laser grid. Some high EMF fields from AC current or other sources were found in many locations. No anomalous hot spots or cold spots were noted. No anomalous motions were noted. No EVP clips were found made of words formed by the P-SB7. Two EVP clips were recorded by standard digital recording. We feel that these experiences, and the positive tests received are probably indicative of an anomalous presence or presences, and that these do not seem malicious or harmful in any way. This testing, with its consistency and strength, probably is indicative of an anomalous presence or presences, though reclusive in nature. This would also be consistent with occupancy in such a secluded location.

We would like to thank the clients for inviting us into their home, and for the opportunity to study the phenomena there. We would also like to thank them for their most gracious hospitality, and hope that me may be able to return there again soon.
